

# THREAT FACT SHEET

## FIFA WORLD CUP

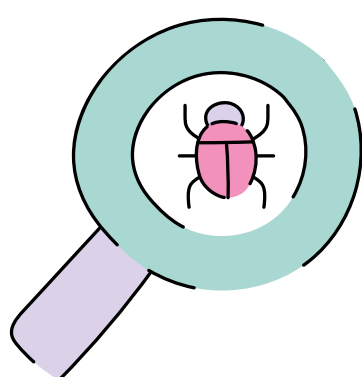

### QATAR 2022

#### THREAT

# 1

## WATCH OUT FOR IMPERSONATING DOMAINS

Impersonating domains are set up to mimic legitimate, trusted organizations to conduct hostile activity and trick users into using these sites to steal personal information, login data, and financial data. **Did You Know:** Over 170 malicious domains impersonating the Qatar 2022 World Cup have already been identified.

Think Before You Click. Double check spelling of the websites. Only use the Official FIFA website for World Cup information and updates. <https://www.fifa.com>

#### THREAT

# 2

## HAVING YOUR CREDENTIALS STOLEN

Stolen credentials threats occurs when an attacker obtains a victim's username/password and use them to gain unauthorized access to victims systems. This can be through phishing emails, social engineering or malware.

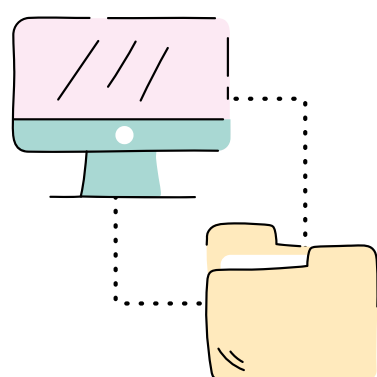

Be cautious when clicking links in emails. These attackers pose as legitimate companies. Review the email of the sender. Use strong and unique passwords. Enable Two-Factor Authentication.

#### THREAT

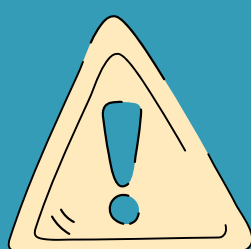

# 3

## AVOID FAKE MOBILE APPS/ FRAUDULENT SOCIAL MEDIA PAGES

Fraudulent Social Media pages are on the rise. They resemble real accounts and cause harm to users. **Did You Know:** Facebook took down 1.3 Billion accounts in 2021. Instagram found 95 M and Twitter found 20 M fraudulent accounts.

Examine profile pictures. Look at how many downloads the app has. Consider the content on page before sharing information on the page. Use sites with signs of user verification only.
